No experience necessary.
Honest.

IDEAS

Clever cable fix

Repair digital darlings

Smart dishwasher fix

Restore rusty racks

Simple zip fix

Rebuild busted zippers

Ingenious toy fix

Mend Mr. Robot

Kids' wellie fix

Seal leaky boots

Sugru is amazing and super-easy to use

Stick It

Sugru sticks permanently to lots of materials like glass, ceramic, wood, metal and plastics*.

Mould It

You have 30 minutes to fix, build and create.

Sets Strong

In 12–24 hours**, it turns into a strong and durable silicone rubber that stays stuck.

*Sugru does not bond to oily plastics like polypropylene, polyethylene or Teflon™.

**Depending on the thickness of the application, for load-bearing projects, allow up to 48 hours for Sugru to fully set.

Clever Cable Fix

REPAIR DIGITAL DARLINGS

Straight out of the pack, Sugru Mouldable Glue is soft and malleable. And thanks to some clever science, once set, it will flex with the materials it's applied to. Save your cables from landfill and charge up.

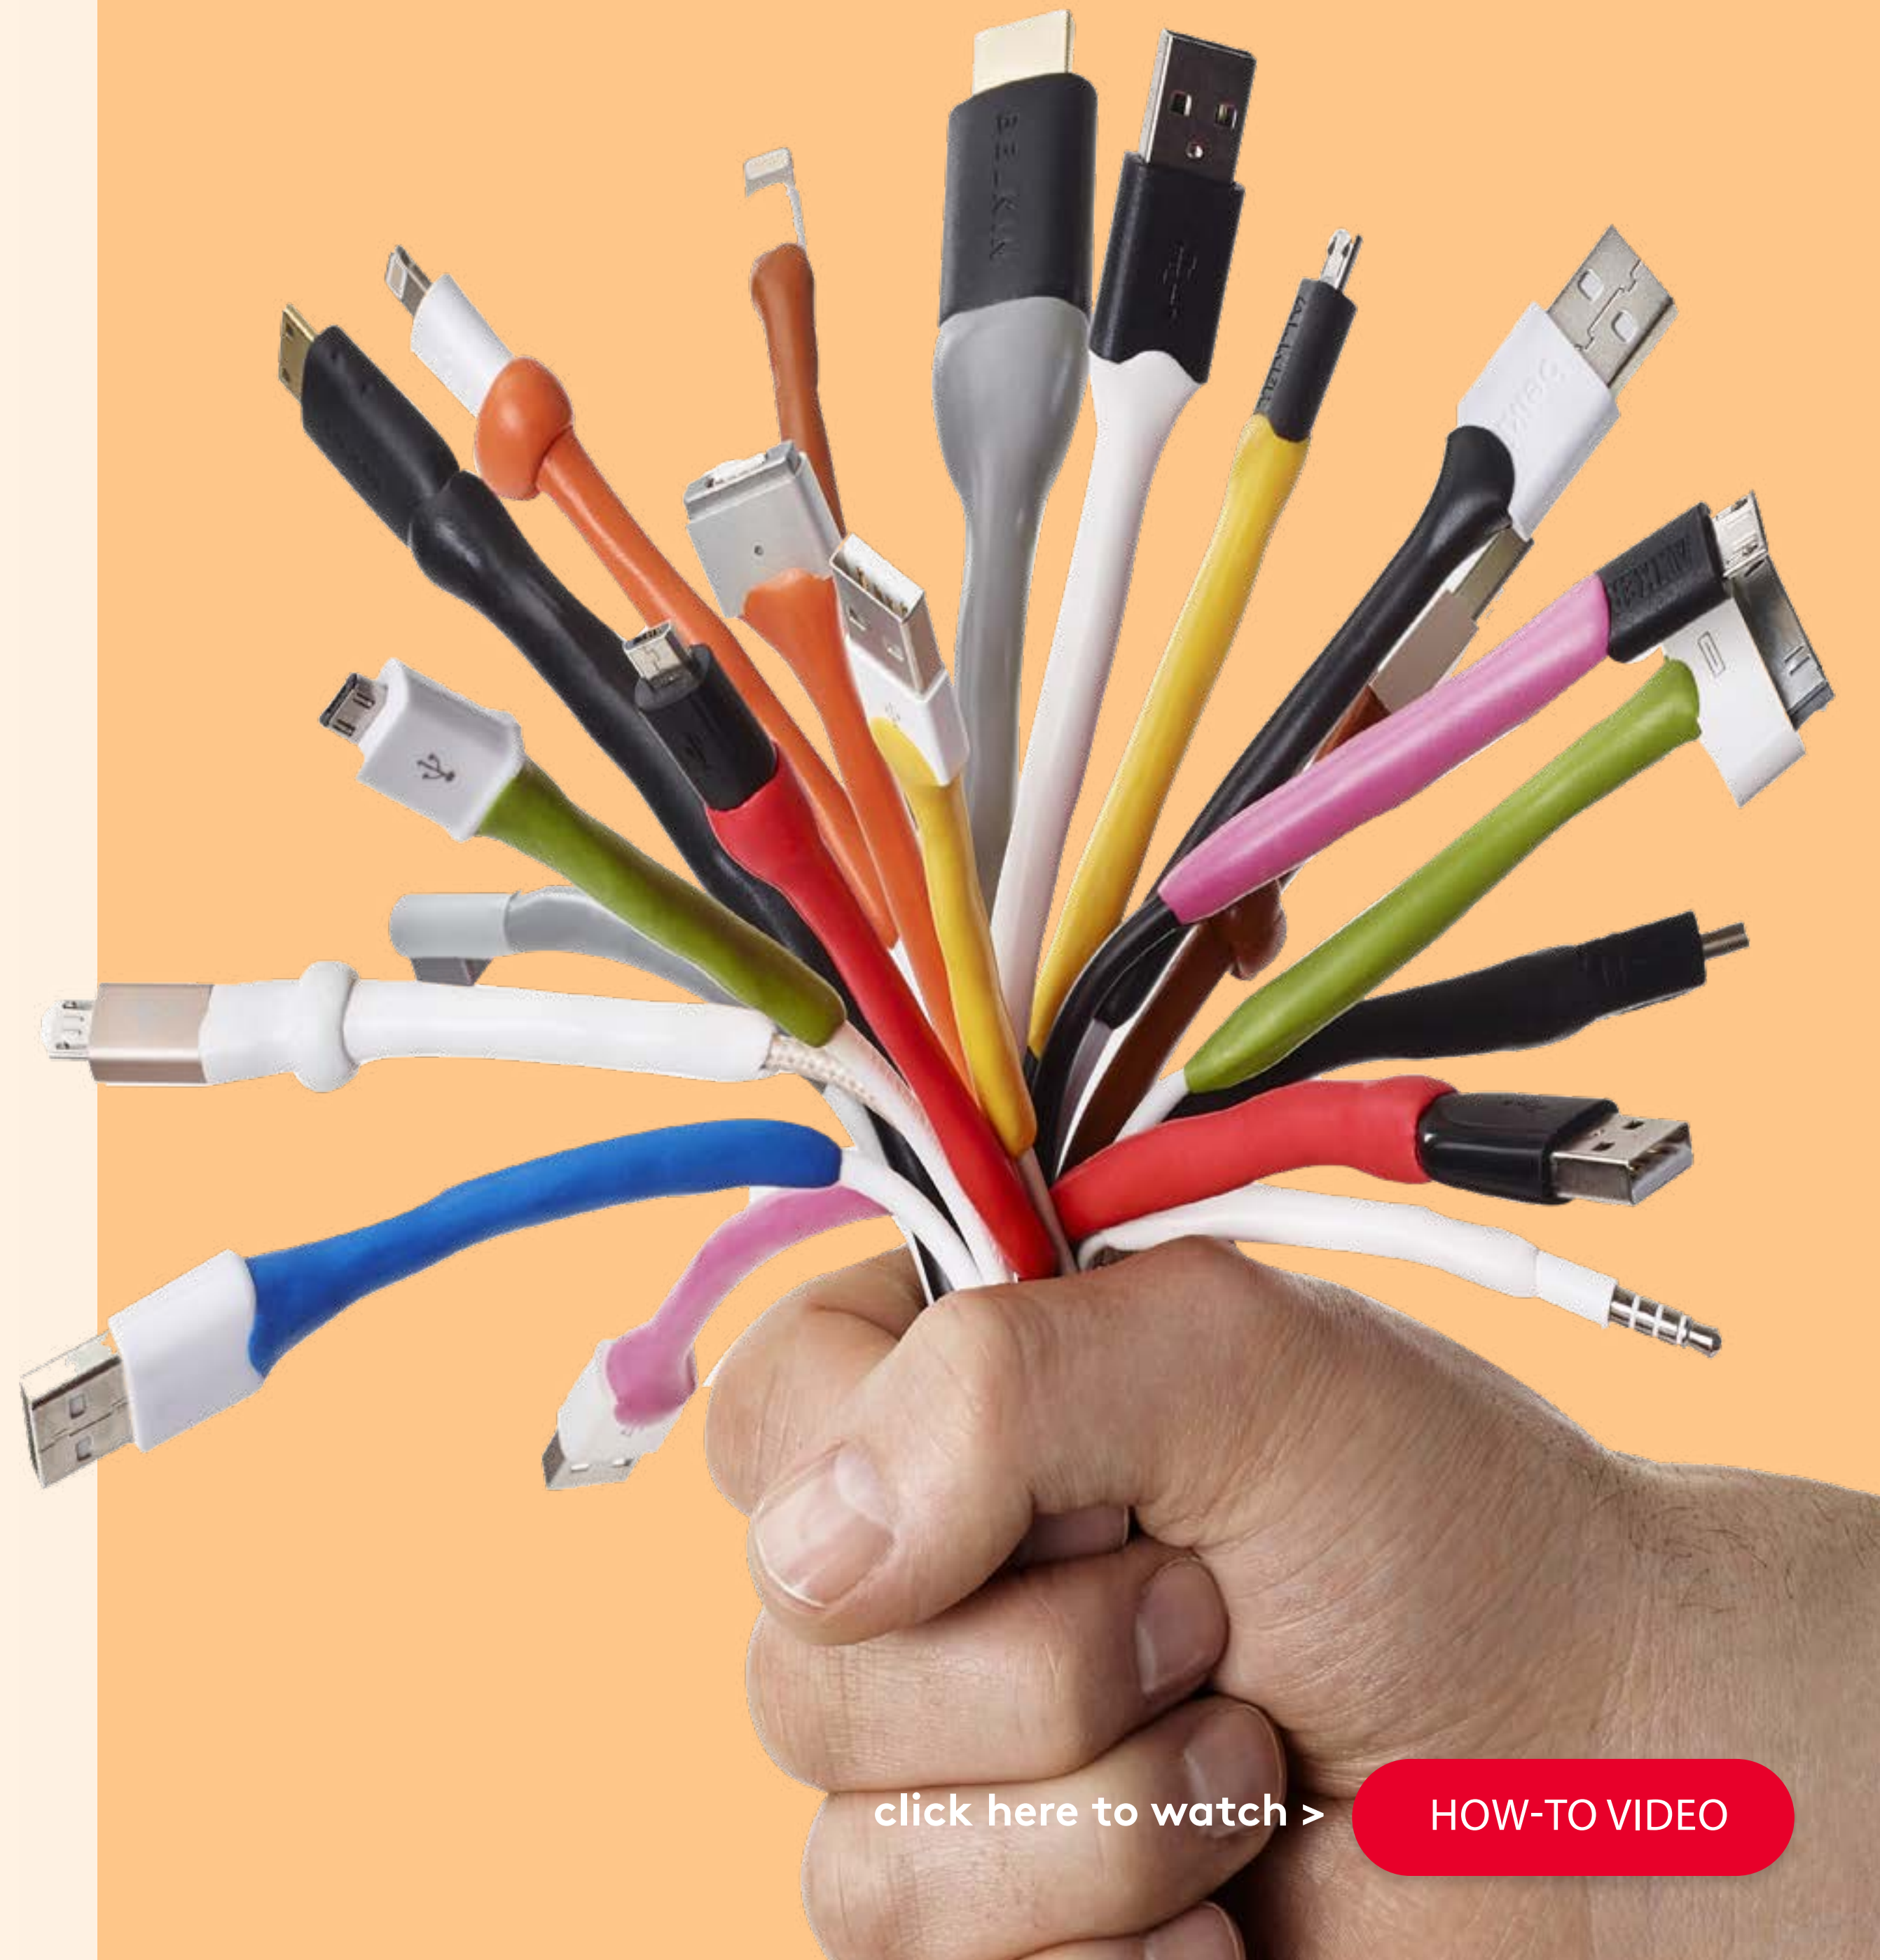

Roll ½ a pack of Sugru into a sausage and press flat.

Wrap it around the cable* and mould it into shape.

In 12–24 hours, it turns into a strong and flexible rubber.

*Be careful with electricity. Stick to small consumer electronics repairs, low current and below 24 volts.

HOW-TO VIDEO

Smart Dishwasher Fix

RESTORE RUSTY RACKS

Classic dishwasher wear and tear can erode plastic-coated racks leaving the exposed metal to go rusty. Nasty.

As Sugru is waterproof and temperature-resistant up to 180°C (356°F), it's durable enough to handle the inside of any dishwasher.

Rack them up and get a load on.

Clean and dry the damaged area of the rack.

Roll some Sugru into a sausage, flatten and wrap it around ensuring it bonds either side.

Smooth the surface, and in 12–24 hours, it turns into a dishwasher-proof seal.

Simple Zip Fix

REBUILD BUSTED ZIPPERS

Zips, zippers, zip-pulls. Whatever you call them, they all have a habit of breaking at just the wrong moment. Fear not.

Just grab a paperclip and build a new one. Once set, Sugru turns into a grippy rubber, that's machine washable and will last and last. Fix it. Zip it. Save it.

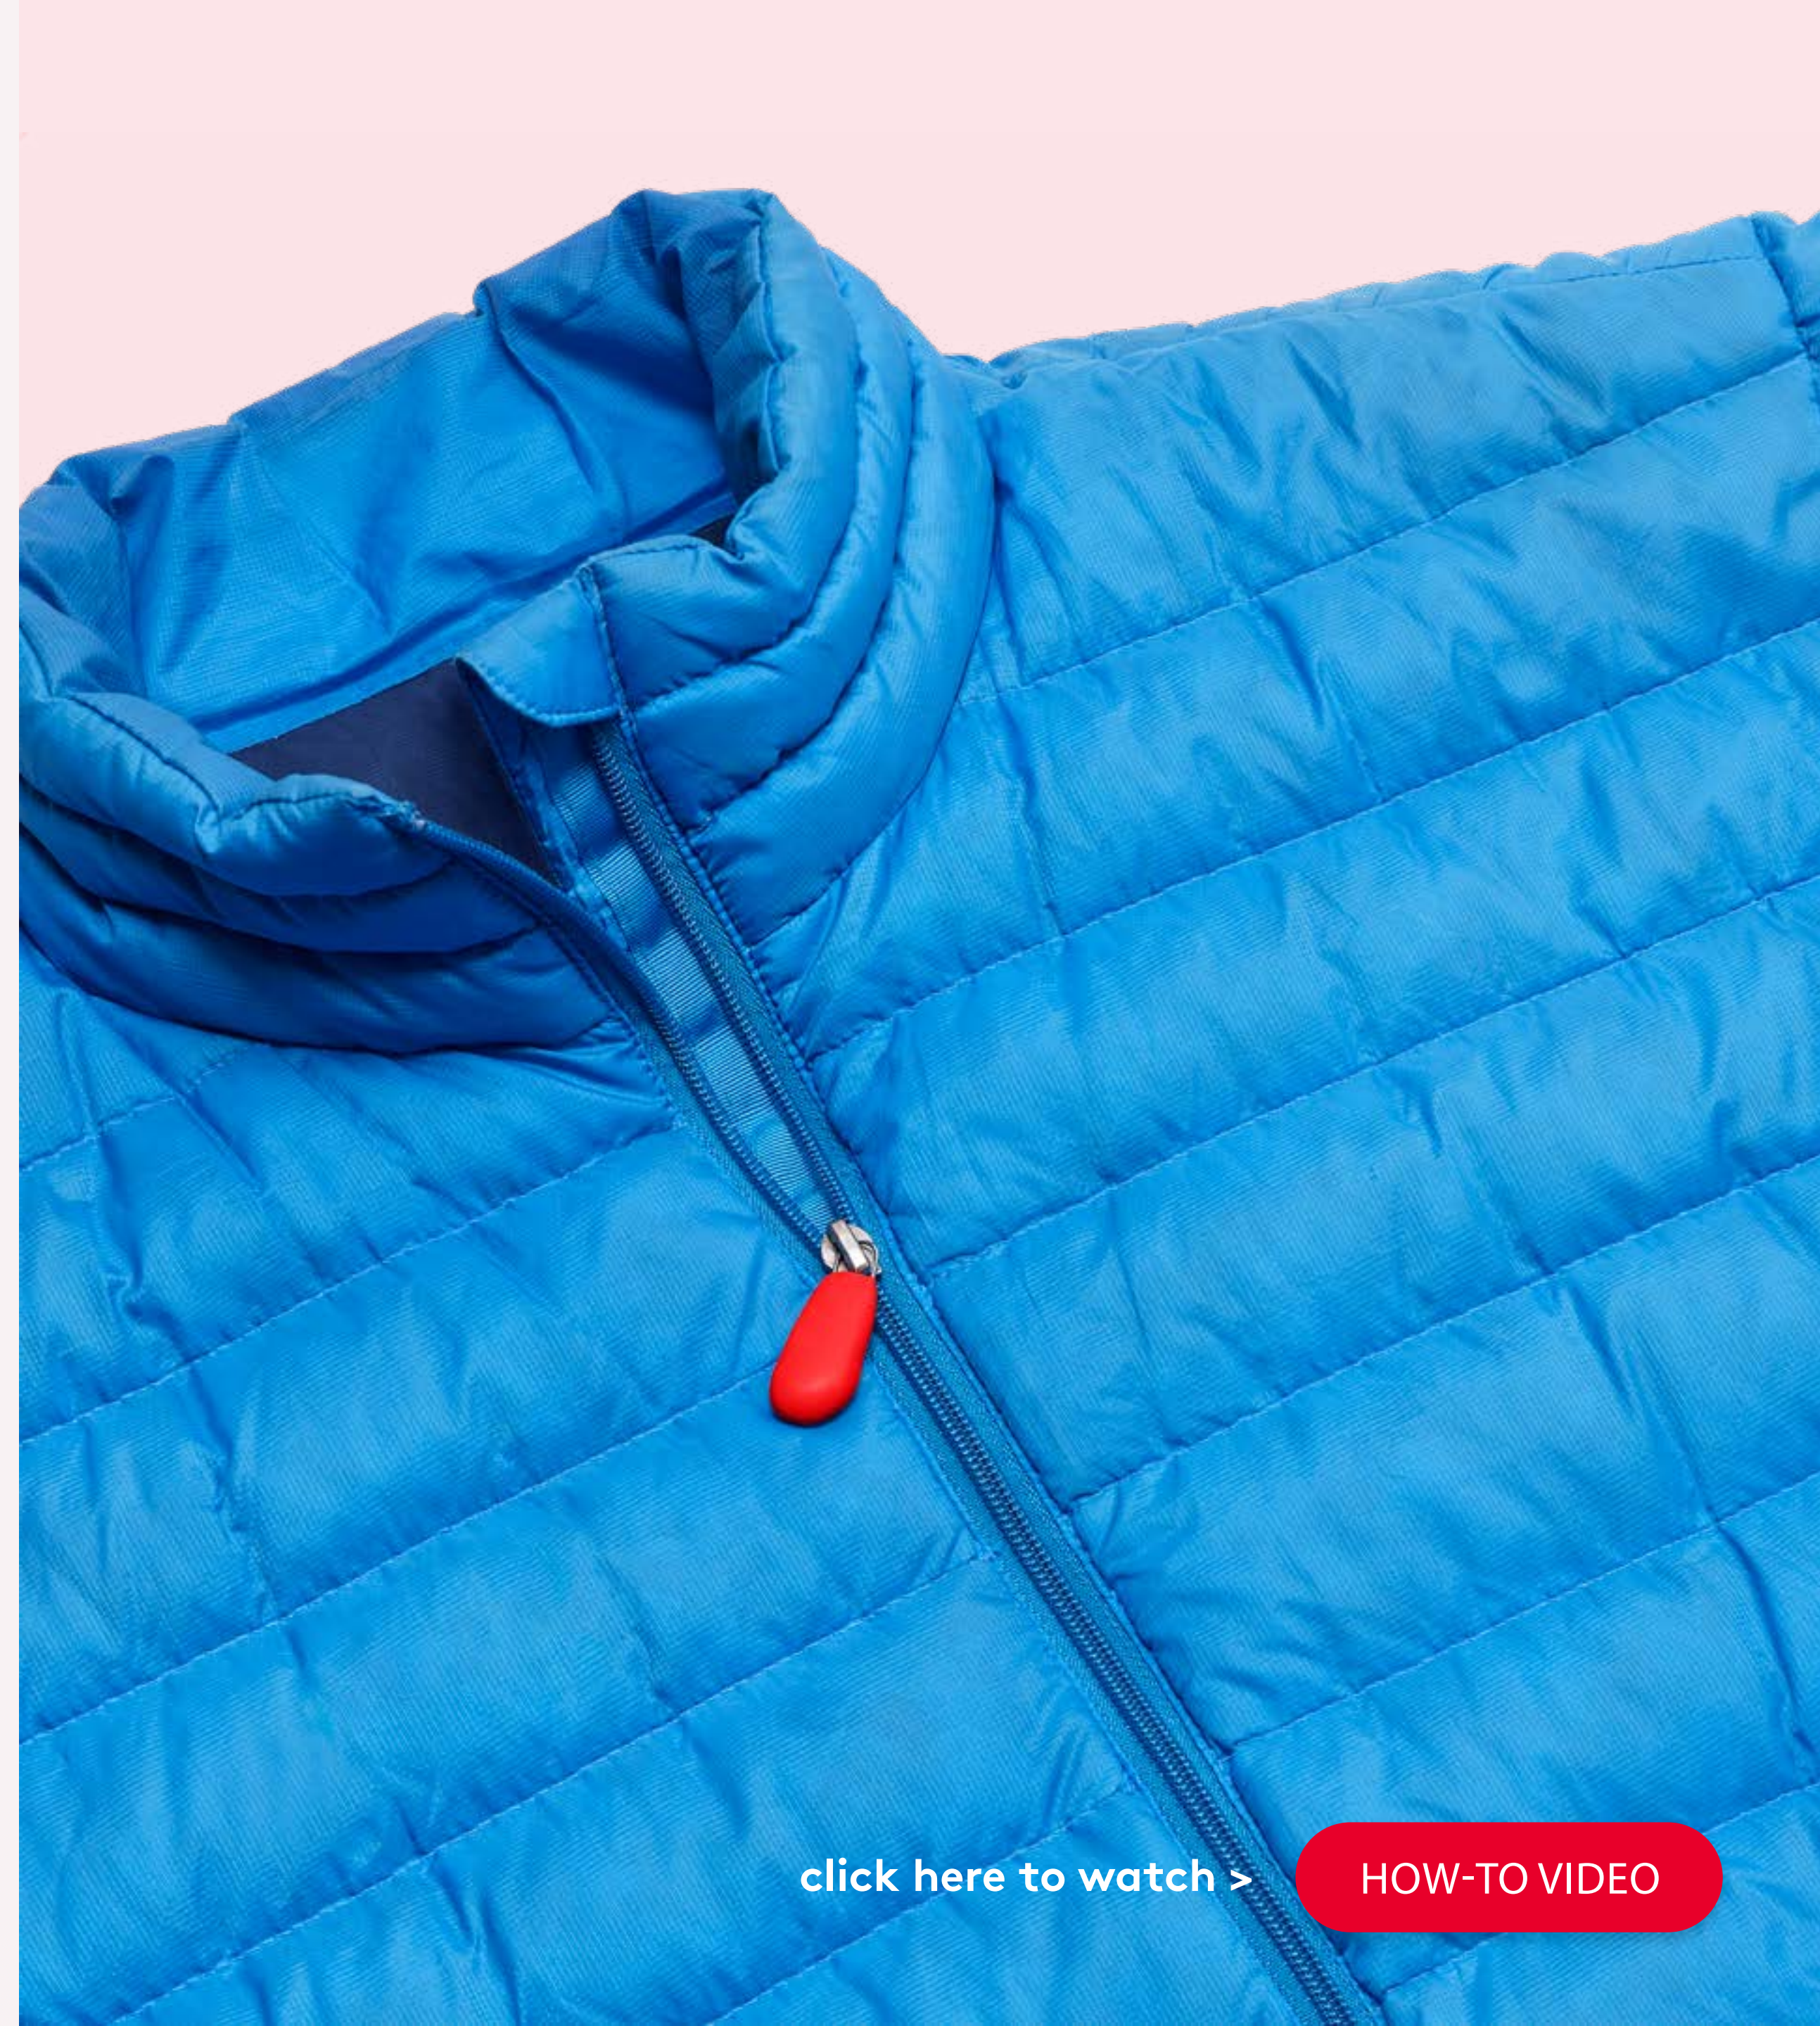

Pop the paperclip onto the base of your zip.

Press ½ a pack of Sugru into a flat disc, wrap it around the paperclip, and mould into any shape.

Rub the surface smooth or texturise. In 24 hours, it turns into a strong and flexible rubber grip.

HOW-TO VIDEO

Ingenious Toy Fix

MEND MR. ROBOT

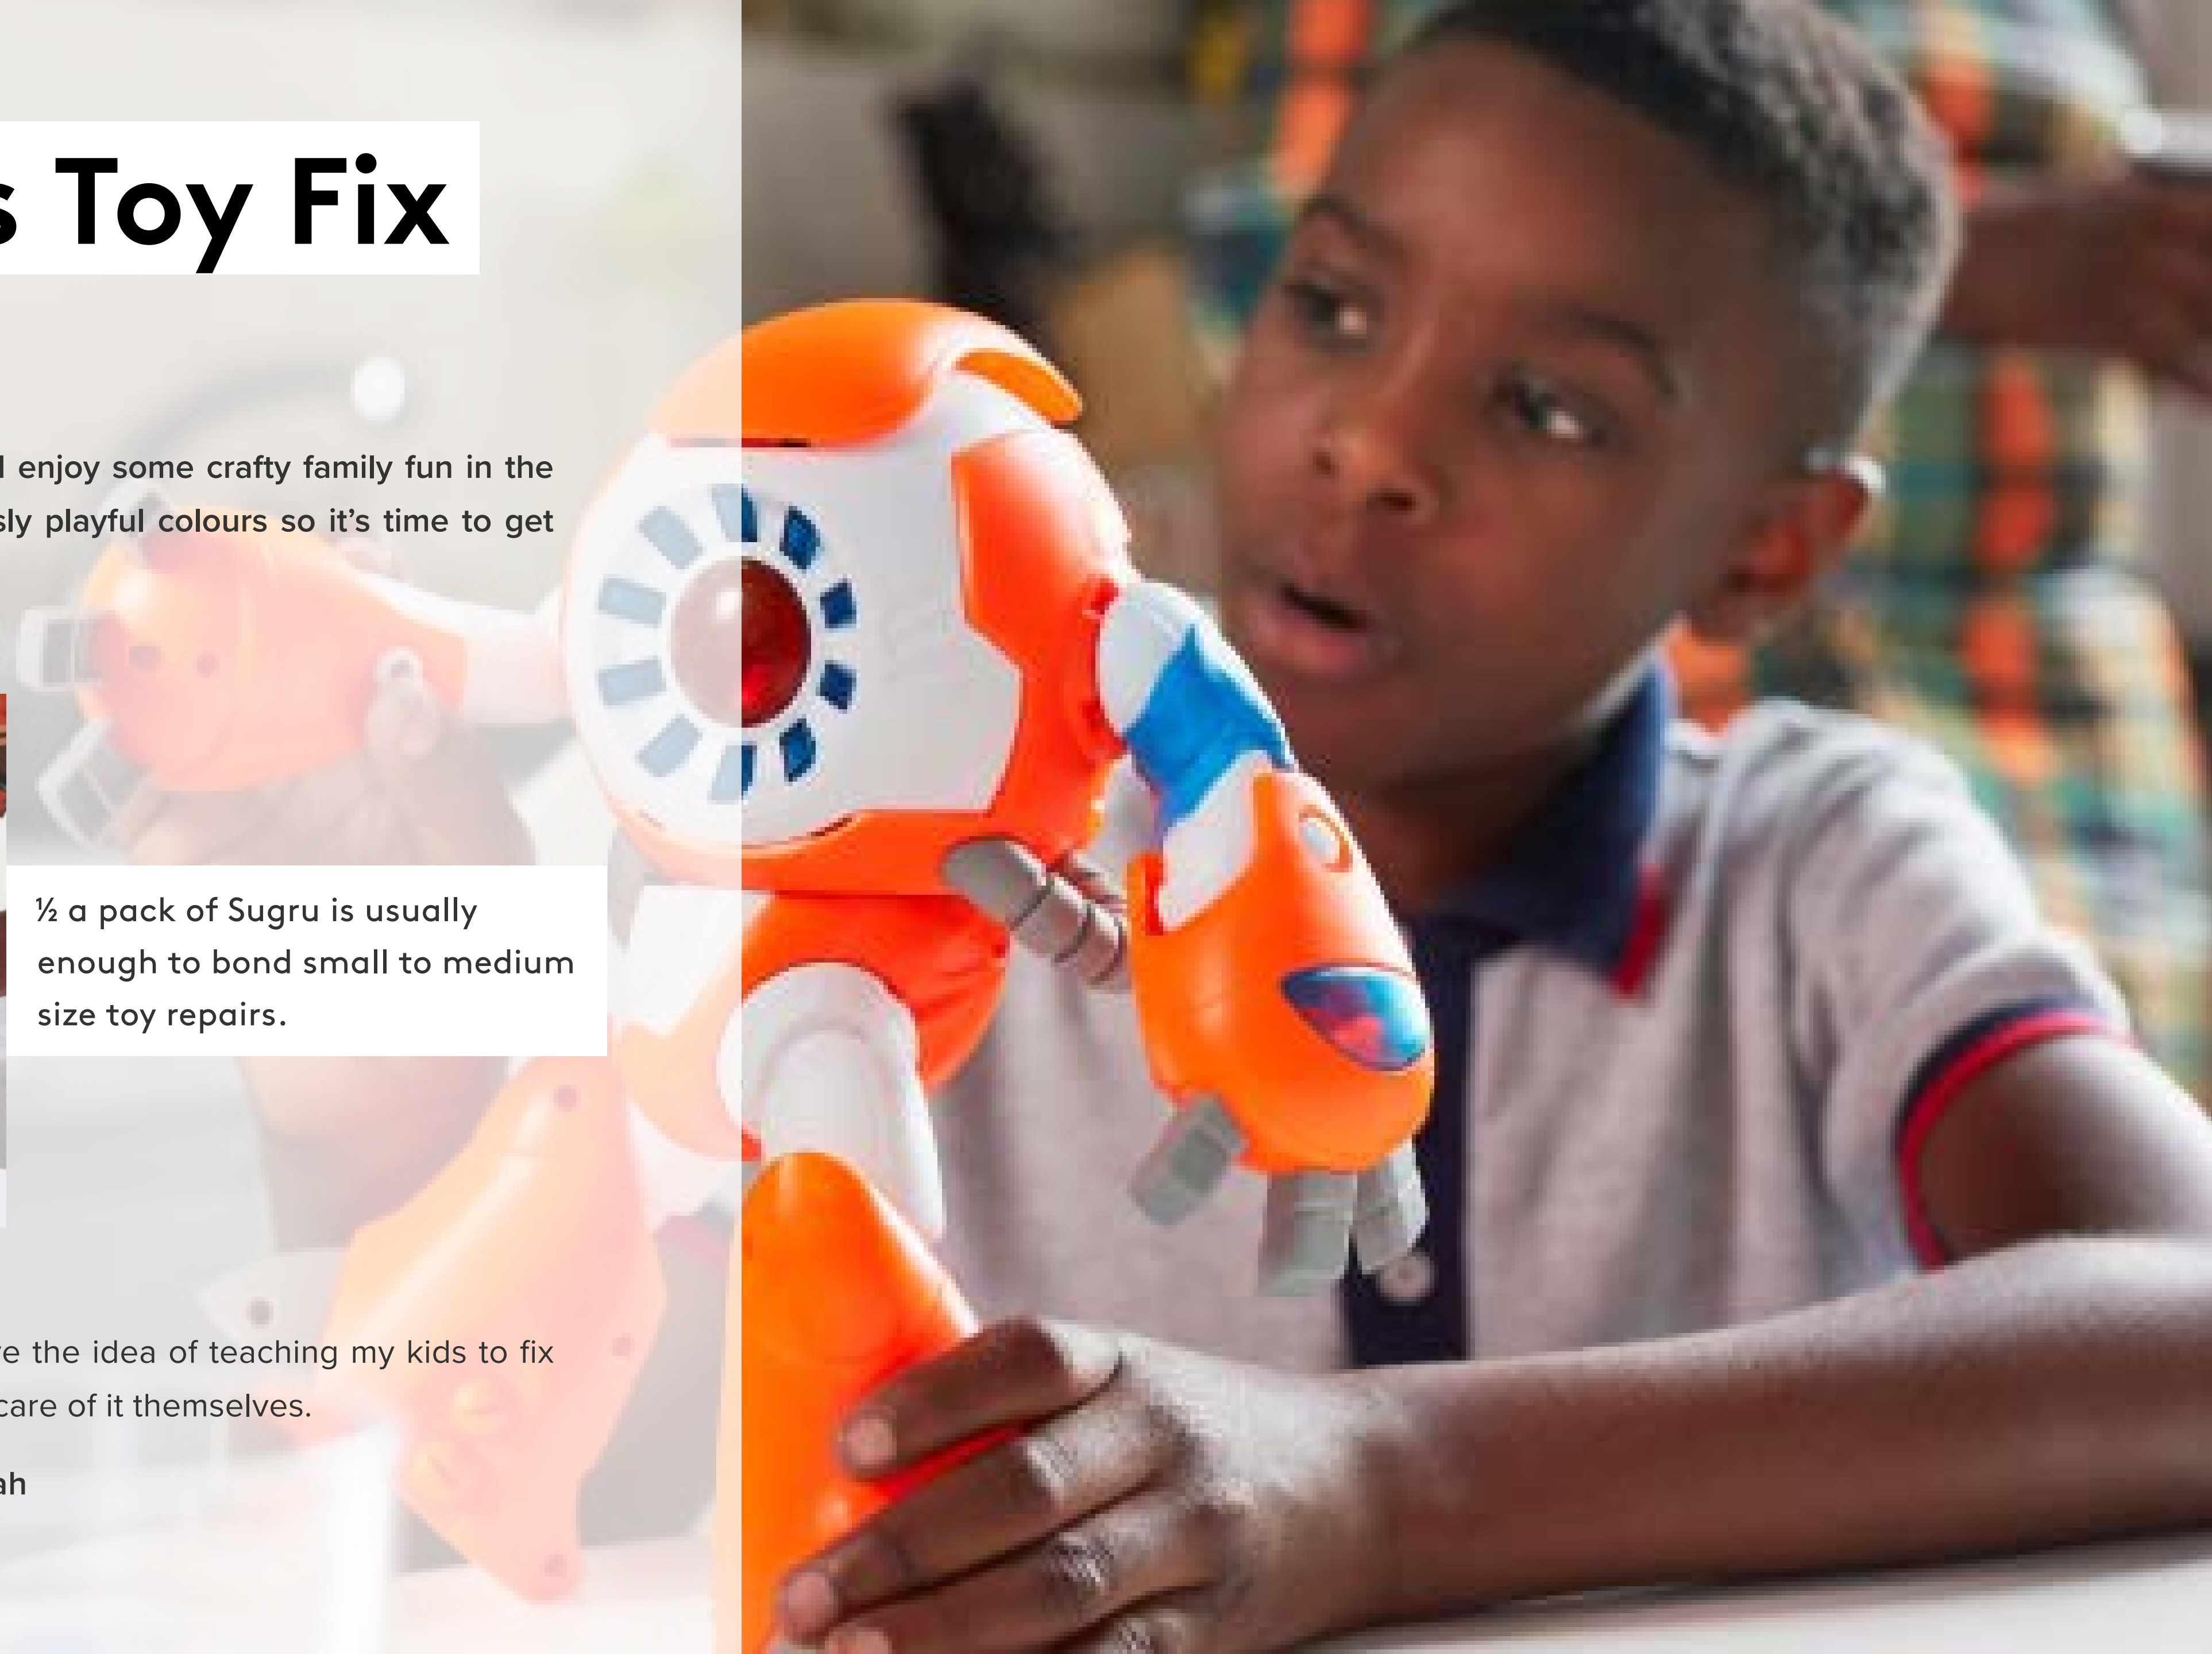

Teach kids to value their things and enjoy some crafty family fun in the process. Sugru comes in 10 seriously playful colours so it's time to get creative!

½ a pack of Sugru is usually enough to bond small to medium size toy repairs.

Micah (8) fixed one of his toys. I love the idea of teaching my kids to fix things...to value their stuff and take care of it themselves.

Tunde, mum of four—including Micah

Kids' Wellie Fix

SEAL LEAKY BOOTS

Playful plug sockets, mischievous light switches, shape-shifting spoons and customised wellie boots. Learn how Helga, our fixing hero mum, creatively reimagines everyday objects around the home.

Sugru is durable, waterproof and weatherproof, so you can fix all kinds of sport and outdoor gear. Ignite your imagination now.

You can Sugru it!

Instead of buying new stuff all the time,
we believe in using our imagination to fix, improve
and reimagine the things we already have.

If it's broken, fix it.

If it's not broken, improve it.

And if it doesn't exist, make it.
